Description

It's not often a near new, custom passage, comes to market, and certainly not in such excellent condition.

Built to endure the test of time, this is truly an intrepid passagemaker- resolutely fearless in design and uncompromising in ocean capability.

Adeptly named Mollymawk, a species of the Albatross family who are masters of efficient flight and can often travel thousands of miles in a single journey, which is ever so similar to this new 24M series built by CIRCA MARINE, the builders of the world-famous Steve Dashew FPB Program.

OceantVault can now offer Mollymawk to the international market only due to a change in personal circumstance where the owners have made the difficult decision to pass on custodianship.

This cutting edge design and efficient hull is unbelievably efficient burning less than 30LPH (7.92 Gal/hr) at 11.5knots and even less at slower speeds extending her ranger up to a whopping 5250NM.

Inside the low maintenance military style hardened shell is an interior filled with light and modernity.

The vast one level living space encompasses the galley, dining saloon, and lower helm station, and is more akin to apartment living than a robust, capable and extremely safe passage maker.

Mollymawk far outways any comparable passage makers on the market and with too many options to list, this is an incredible opportunity to acquire one of the most derisible blue water capable vessels, without the two year build time.

To find out more regarding options and specifications, contact the worldwide central agents today.
